

PhD course 2019

Neurophilosophy of Mind and Consciousness

Helmholtz Institute (GS Social and Behavioral Sciences, Cognition and Behavior)

The question that has baffled scientists and philosophers for centuries is > how molecules, cells, neurotransmitters and hormones in our brains create consciousness and self-awareness? There have been breakthroughs in the fields of philosophy, psychology, neuroscience and psychiatry, but the quest for understanding the origins of mind and consciousness continues. The PhD course *Neurophilosophy of Mind and Consciousness* provides students with novel and practical insights into this field, which will contribute to theorizing and academic writing skills.

Format:

Neurophilosophy of Mind and Consciousness

is a 5-day, 3 hours a day course, which includes lectures & discussions by experts in the fields of Psychology and Neuroscience, and apart from the daily meetings, literature study and a writing assignment.

Lecturers are:

Dennis Schutter (Donders Institute, Nijmegen University)

Jack van Honk (Utrecht University, University of Cape Town)

Dates: 6, 7 en 12, 13, 14 June

Location: [Uithof Utrecht](#)

Credits: 2 EC

Application:

Please apply by sending an email to jackvanh@gmail.com. This Helmholtz Institute course is exclusively for national and international PhD students. Students from Helmholtz and affiliated institutes participate free of charge.
